Chairman's Message

Dear Professional Colleagues,

“The capacity to learn to is a gift; the ability to learn is a skill; the willingness to learn is a choice.”
– Brian Herbert

I always had a dream to make all corners of my esteemed fraternity to cope with all the latest technological developments, Understanding and appreciating that we professionals are left with very little time to learn about technological advancement which our world has gone through, hence lagging behind different know how of the IT Field. I take this opportunity to introduce a course **for our elderly professionals, 50:50 Technology for Senior Professionals – 50 Key areas to learn in Computers and Information Technology.**

Senior professionals face barriers and challenges when it comes to adopting IT techniques. With passage of time and also seeing the demand of the hour and keeping in mind the concept of green initiative throughout the universe, IT know how and knowledge is something which cannot be denied & avoided for long. In line of the same which is miles apart from the previous practices of hard copies communications we have moved a long way in bringing the IT world in effect. I hope this design of course will immensely help our senior professionals which will provide them with necessary aid to deal with the required IT knowledge.

I wish to place on record the contribution and unstinted support by all my colleagues in the Regional Council & Central Council in providing all out support for conduct of this course. I must make special mention of CA Sanjib Sanghi, Chairman, Information Technology Committee of EIRC who has put tireless effort in making this course a reality.

Wish all the participants a great learning experience.

Chairman Information Technology Committee's Message

Dear Professional Colleagues,

Let's Bring Technology to our Profession. This was my mantra since inception as the Chairman of the IT Committee of EIRC of The ICAI. Taking a step forward in this direction we have designed this course **50:50 Technology for Senior Professionals – 50 Key areas to learn in Computers and Technology.**

Learning has no age. We all are aware that there are many people in their 50's and 60's going back to college to earn their degree. At that point in their life they are probably doing it because it is something they want to accomplish. In a similar way Technology is vast changing and with Computers now being a part of life, there are many elderly professionals who want to get expertise in handling the same, with this intention we have launched this course to share our knowledge with them and to make them aware what a wealth of knowledge is available online. I certainly feel that this small step will have some impact in enriching their lives and empowering them.

I take this opportunity to place on record my sincere gratitude to CA Anirban Datta, Chairman, EIRC for entrusting me with this responsibility of being the Chairman of Information Technology Committee of EIRC. I would like to appreciate the sincere efforts of the dedicated team of professionals who have worked to make this course a reality.

I am sure that the members will definitely benefit from this course and it would create some difference in their life. I would be glad to receive inputs and suggestions for designing more of such courses in the near future.

I would just end by saying ***"It is not what Technology does to us, it is what we do to Technology. Get smart with Technology, choose wisely and use it in a way that benefits both you and those around you"***
